

# Florida Climate Smart Agriculture

## Solution pathways

### Keep Working Lands Working

- Ecosystem Service Payments
- Farmland Protection
- Risk Management
  - Prevention
  - Disaster Response
- Phytosanitary protection
- Research
- Other

**FUTURE**  
**STATE**

*Sustainable and resilient farming systems that produce food, feed, fiber, energy and ecosystem services."*

## "To- Dos"

- Build a coalition of nontraditional partners (health, nutritional, environmental, economic development, faith-based)
- Recruit motivated ag leaders and champions
- Align value chain, academic and governmental partners
- Develop a vulnerability assessment and marketing plan
- Document/quantify the ecosystems services farms, ranches and forests provide
